## Testing Guesses - Student Worksheet

Farmers need a good fall of rain before planting.  
For wheat they need **20mL** of rain to soak the soil.

Guess which container would hold 20mL of water exactly.  
A bucket, a cool drink bottle or four teaspoons?

My guess \_\_\_\_\_

Let's test the guess!

A teaspoon holds 5mL. Colour in five blocks for each teaspoon.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20

How many teaspoons do we need? \_\_\_\_\_
