

Save our Soil Poster - Teacher's Notes

Students are invited to draw a poster using one of the ideas below.

1. Don't walk on soil as you squash it and this makes it difficult for rain and roots to penetrate. Keep to the pathways when you walk or ride bicycles and skateboards.
2. Don't throw away rubbish as this can pollute the soil.
3. Don't throw away water with paint or chemicals into the garden. It will poison the plants and kill the worms.
4. Have a compost center or worm farm to improve the quality of the soil.
5. Place mulch onto the soil to keep it cool and moist over summer.

Marking key

Simple snappy title in large letters	1 mark
Drawing fills the space and is easy to understand	2 marks
Uses few colours	1 mark
Checked by fellow student	1 mark
Name on back	<u>1 mark</u>
	6 marks
