

## Fishbone - Teacher's Notes

## Revision sheet for "Soils"

A fishbone graphic organizer allows students to revise what they have learned and classify, or put the information they have gained, into context (processing and analysing information). At the fish head students write the topic "SOILS". Then, either alone or in groups, they can write what they remember as important information along the bones of the fish skeleton. They may use past worksheets to remind themselves of important words.

The most interesting thing I learnt was \_\_\_\_\_

\_\_\_\_\_
